Letter of Recommendation

With strong conviction, I would like to recommend Mr. Mrinal Choudhary as a potential candidate for internship at your organization. I have known Mrinal as a student of undergraduate studies at Thapar Institute of Engineering and technology, Patiala, India. As a teacher in the Mechanical Engineering Department, I have taught him the Innovation and Entrepreneurship course. I found him very sincere, dedicated, and responsible about the task assigned to him.

My interaction with him is not limited to classroom teaching, he has also worked with me in a minor project related to development of a low cost accelerometer for structural vibration measurement and analysis. He designed and fabricated the accelerometer and completed its initial testing on a standard vibration exciter. In all the meetings, I gauged him as a creative individual and quick learner with great grasping ability.

As my final remark, I highly recommend Mrinal as an intern candidate. He is capable of working in different types of R&D project work; I strongly believe that he will be a great asset to your organization. If you have any questions regarding his abilities or the recommendation, please do not hesitate to contact me.

Ashish

Dr. Ashish Purohit
